Sorry. uucp name is "chinacat". FQDN should be "chinacat.Unicom.COM".

> > Please note that I changed sections 0, 7, and 8 around to reflect  
> > cs.utexas.edu as my primary forwarder and uunet.uu.net as my secondary  
> This was not good because it really gets messy configuring things. [...]

> forwarding (you kept mentioning forwarding when speaking of the question).

Yep. Sorry about that. I left 7 & 8 as you fixed them.

> Thus, I changed everything back to the way it originally was. Your MX  
> forwarder will still be cs.utexas.edu as you changed question 0 to read.

OK...I think this is all getting me what I want.

> BTW, do you think you could also send me your title (answers 5c and 6c)?  
> It seems to be missing and there should be one there to make the NIC happy  
> even if it's a silly one (and there have been many of them).

Errr...president? owner? director of engineering? janitor? all of the  
above? OK...I'll stuff something in there.

Sorry about the hassles. Thanks for the help.

[ THE FORM STARTS HERE. ]

(0) Specify what machine you want to be your forwarder. If you are directly  
connected to uunet, uunet can be your forwarder. If you are not  
directly connected, then you need to find some other site to be your  
forwarder OR get the permission of a site that IS directly connected to  
uunet to allow your arpanet mail to be forwarded through them. We must  
receive the permission of the uunet site or the other forwarded  
directly from that forwarder.

Who will be your forwarder?:

CS.UTEXAS.EDU

[ NETINFO:DOMAIN-TEMPLATE.TXT ]

[ 8/89 ]

To establish a domain, the following information must be sent to  
the NIC Domain Registrar (HOSTMASTER@NIC.DDN.MIL). Questions  
may be addressed to the NIC Hostmaster by electronic mail at the  
above address, or by phone at (415) 859-3695 or (800) 235-3155.

NOTE: The key people must have electronic mailboxes and NIC  
"handles," unique NIC database identifiers. If you have access to  
"WHOIS", please check to see if you are registered and if so, make  
sure the information is current. Include only your handle and any

changes (if any) that need to be made in your entry. If you do not have access to "WHOIS", please provide all the information indicated and a NIC handle will be assigned.

(1) The name of the top-level domain to join (EDU, COM, MIL, etc...)

1. Top-level name:

COM

(2) The name of the domain (up to 12 characters). This is the name that will be used in tables and lists associating the domain with the domain server addresses. [While, from a technical standpoint, domain names can be quite long we recommend the use of shorter, more user-friendly names.]

2. Complete Domain Name:

UNICOM.COM

(3) The name and geographical address of the organization establishing the domain.

3a. Geographical address:

2813A Rio Grande  
Suite 105  
Austin, TX 78705

3b. Organization name:

Unicom Systems Development

(4) The date you expect the fully qualified domain name to become the official host name in HOSTS.TXT, if applicable.

4. Date operational: Will not appear in hosts.txt

(5) The NIC handle of the administrative head of the organization. Alternately, the person's name, title, mailing address, phone number, organization, and network mailbox. This is the contact point for administrative and policy questions about the domain. In the case of a research project, this should be the principal investigator.

Administrative Contact

5a. NIC Handle (if known) :

5b. Name (Last, First) : Rosenthal, Chip

5c. Title : President

5d. Organization: Unicom Systems Development

5e. Mail Address: 2813A Rio Grande

Suite 105  
Austin, TX 78705

5f. Phone Number: 512-482-8260

5g. Net Mailbox : chip@chinacat.unicom.com

(6) The NIC handle of the technical contact for the domain. Alternately, the person's name, title, mailing address, phone number, organization, and network mailbox. This is the contact point for problems concerning the domain or zone, as well as for updating information about the domain or zone.

Technical and Zone Contact

- 6a. NIC Handle (if known) :
- 6b. Name (Last, First) : Rosenthal, Chip
- 6c. Title : President
- 6d. Organization: Unicom Systems Development
- 6e. Mail Address: 2813A Rio Grande  
Suite 105  
Austin, TX 78705
- 6f. Phone Number: 512-482-8260
- 6g. Net Mailbox : chip@chinacat.unicom.com

(7) Domains must provide at least two independent servers that provide the domain service for translating names to addresses for hosts in this domain. Establishing the servers in physically separate locations and on different PSNs is strongly recommended. A description of the primary and secondary server machines, including

- Host domain name and network addresses
- Any domain-style nicknames (please limit your domain-style nickname request, if any, to one)
- Hardware and software, using keywords from the Assigned Numbers RFC.

Primary Server: HOST-DOMAIN-NAME, NETADDRESS, HARDWARE, SOFTWARE

- 7a. Primary Server Name: uunet.uu.net
- 7b. Primary Server Netaddress: 192.48.96.2
- 7c. Primary Server Hardware: SEQUENT-S81
- 7d. Primary Server Software: UNIX

(8) The Secondary server information.

- 8a. Primary Server Name: seismo.CSS.GOV
- 8b. Primary Server Netaddress: 192.12.141.25
- 8c. Primary Server Hardware: SUN-3/160
- 8d. Primary Server Software: UNIX

(9) A description of the servers that provide the domain service and the date they will be operational.

9. Description and date operational: BIND. now operational

(10) Planned mapping of names of any other network hosts (including any ARPANET or MILNET hosts), other than the server machines, into the new domain's naming space.

none

(11) Please describe your organization briefly.

Unicom Systems Development is an engineering consulting firm performing custom hardware and software design, and specializing in small UNIX systems.

PLEASE ALLOW AT LEAST 30 WORKING DAYS FOR PROCESSING THIS APPLICATION

Chip,

This message is to serve as official notification that we've assigned  
a new Class C network number for UNICOM. The new number is #192.108.105  
and will replace the previous number 192.89.122.

Please let us know if you have any additional comments or questions  
regarding this assignment.

Hi Chip, my name is Corry Hong a software developer. Back in 1985, I developed a product called AUTOMON/CICS which runs on IBM op systems such as MVS and VSE. It is an artificial intelligence product which identifies systems/network problems and takes proactive actions automatically to prevent system crashes. I am also the founder of unicom systems, inc., a california corporation. our internet domain is unicomsi.com. On many occasions, my prospects are confused when they reach your internet domain unicom.com by mistake. Chip, I was wondering what it will take to convince you to grant us the use of unicom.com ??? may be a job offer, a business partnership, etc. Thanks. -Corry-

Thanks for the interest, Corry. The UNICOM.COM domain is an active use, and is pretty well known on the net. For instance, it's pretty well known as the place to retrieve a fairly popular email security tool. The effort and expense to relocate my domain would be pretty major. I won't say, "absolutely no way," but I couldn't see letting it go for any reasonable amount of money.

It seems that "unicom" is a pretty popular name, and I do see some misdirected mail on occasion. I don't, however, recall any queries regarding your product. Mostly it's people confusing me with UNICOM.NET, an ISP.

If it would be of any help, I would be glad to try to redirect any of your customers that might end up in the wrong place. For instance, I'd be willing to add a paragraph of text (with a link to your site) to my "What's This Place" web page if you think that would be worthwhile.

> a few months ago?

No, I am the original and sole owner of the UNICOM.COM domain.  
I've been using it for about eight years now. It's been pretty  
widely published (as evidenced by the amount of spam I get \*sigh\*).  
Both the domain and my address are moderately well known in certain  
Internet circles.

Since it's been in use for so long, I'm not concerned simply about  
the effort, but also the cost to my business and the loss of the  
reputation that's been established.

I've had queries and offers before, so it isn't the first time I've  
thought about this. If I had to grab a number, it would be in the  
mid-five-figure range. I haven't bother nailing it down further,  
because I have trouble envisioning it being worth that much to  
anybody but me.

Hi Chip, I thank you for your e-mail. First of all I'd like to let you know that in the 80's I developed key main-frame-based artificial intelligence products that are currently being used by many well known companies worldwide. I have a reputation in the industry as straight-forward and to-the-point. I do not waste my time on menial sales or negotiations--that's why I hire sales people.

In response to your willingness to sell at mid 5 figure range, as a software company (not an internet company), I simply cannot justify its value. I am willing to pay you \$5,000 if we can strike a deal within a couple of weeks. My only intent is to buy the website address--not your entire company. \$5000 is more than an ample offer for such an acquisition.

FYI, I am also speaking with the owners of unicom.net regarding the same for \$4,000 (the company has been recently acquired by another internet company). Chip, our need of unicom.xxx is simply for the name's sake. In addition to paying you \$5,000, the following opportunity is presented for you: 1) I may hire you as a consultant for our various software development projects; or 2) I may hire you as an employee/software developer. I am enclosing the following files: (Note: File\_Format=Windows98 & Office97)

Thank you. -Corry-

Table with 4 columns: File\_Name, Description, Type, and an unlabeled column. It lists files like GD3801A4.WHY, GC680420\_Excel\_003, GD3801C2.RE2, and AUTOMONUserGuide with their respective descriptions and file formats (MSWord, MSEExcel).
